Seed Detectives

Become a seed detective and match tiny seeds to the plants they can become.

Little growers, big discoveries

10 MIN | SEEDS AND OBSERVATION | AGES 5+ WITH AN ADULT

Grab your kit

Three different seed packets with plant pictures, a few seeds from each, three small dishes, paper and a pencil. A magnifying glass is optional.

Your discovery mission

1. Ask an adult to put each type of seed in a separate dish. Keep the packets nearby, with their pictures hidden at first.
2. Look closely at the seeds. Compare their size, shape and colour. Draw one seed from each dish.
3. Reveal the packet pictures. Guess which plant belongs to each dish and explain your choices.
4. Check the matches with the adult. Label your drawings with the plant names and one describing word.

What did you discover?

Seed I examined: _____
A detail I spotted: _____

Draw your discovery

Let's wonder...

Does a bigger seed always belong to a bigger plant? How could you investigate?

NEXT ADVENTURE

Make a matching game with your seed drawings and plant pictures. Challenge someone to find the pairs.

Seeds are for examining, not eating. Keep small seeds away from younger children and wash hands afterwards.
