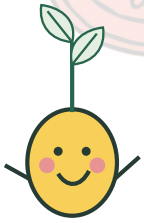
Garden Bingo

Look closely at your growing space and play a spotting game.



Little growers, big discoveries

15 MIN | NATURE AND OBSERVATION | AGES 5+ WITH AN ADULT

Grab your kit

Paper, a pencil and a safe view of your Gro Box or another growing space.

Your discovery mission

1. Draw a grid with three rows and three columns. Fill the nine spaces with: leaf, stem, flower, soil, shadow, water droplet, new growth, insect and something green.
2. Look around without picking or disturbing anything. Tick a space when you spot its item.
3. Try to complete a row, column or diagonal. Some items may be missing today; that is part of the discovery.
4. Show someone your finds and describe where you saw them. Draw one item that surprised you.

What did you discover?

Items I found: ____ out of 9
My most surprising find: _____

Draw your discovery

Let's wonder...

Which things were easy to find? Would the same grid work in winter?

NEXT ADVENTURE

Make a new grid using things you can see today. Swap grids with a friend or family member.

An adult checks the outdoor space. Look without touching unknown plants or insects; you can also play through a window.
